SUMMARY

Aspiring Software Development Engineer with strong proficiency in Data Structures & Algorithms, having solved 600+ DSA problems on [LeetCode](#). Experienced in building scalable web applications using React.js, Spring Boot, and Node.js. Skilled in Java, C++, JavaScript, SQL, and modern development practices including Agile methodology and RESTful APIs. Quick learner with strong problem-solving and communication skills, eager to contribute to high-impact engineering teams.

EDUCATION

Shivaji Rao Kadam Institute of Technology & Management(Autonomous) Indore, IN
Affiliated to RGPV, Bhopal Aug 2022 – May 2026
Bachelor of Technology in Computer Science & Engineering

Bharat Higher Secondary School Aug 2020 – May 2022
Senior Secondary Education Class 12th : **79.2%** , Class 10th : **77%**

PROJECTS

Click-Cart | [Github-Repo](#) Dec 2025 – Jan 2026

- Developed a production-ready e-commerce web application using a **MERN stack (MongoDB, Express.js, React.js, Node.js)**, encompassing user registration, product catalogue, and order checkout pipelines.
- Secured application endpoints by implementing **JWT-based authentication** with HTTP-only cookies, preventing client-side token exposure and protecting 100% of private routes from unauthenticated access.
- Modelled and integrated a **MongoDB** NoSQL database to persist user profiles and product inventory, enabling flexible document storage and rapid iteration on data schema.
- Constructed a responsive, dynamic frontend using **React.js** with React Router for navigation and Context API for global state, supporting a seamless multi-page shopping experience.

Mega Blog | *Appwrite, React, Git* Sep 2025 – Oct 2025

- Integrated **Appwrite** as a Backend-as-a-Service layer to handle user authentication, database storage, and file management, eliminating the need for a custom backend and reducing development time by ~40%.
- Programmed complete CRUD functionality for blog posts using **Appwrite SDK and React.js**, enabling authors to create, publish, edit, and delete content with real-time UI updates.
- Enforced access control by implementing authentication guards and protected routes, ensuring only authorised users could perform content mutations.
- Structured the application using reusable **React functional components** with Hooks-based local state management, maintaining clean separation of concerns across 10+ UI components.

TECHNICAL SKILLS

Programming Languages: C++, Java, SQL, JavaScript

Frontend & Backend Technologies: HTML, CSS, React.js, Node.js, Spring Boot, Tailwind CSS, REST APIs

Databases: MySQL, MongoDB

Tools & Platforms: Git, Postman, VS Code, IntelliJ IDEA.

Soft Skills: Problem-solving mindset, Attention to detail, Team collaboration, Communication skills, Adaptability.

Core Concepts: OOP, OS, DBMS, CN, SDLC.

CERTIFICATIONS

- GFG 160 Days DSA Challenge Completion – Geeks for Geeks
- Data Analytics Workshop Completion by Geeks of Gurukul
- Complete Remote Sensing Data Analytics for Crop Production Fore Casting by ISRO
